Sentry-go Plus!
monitoring *v6*

Key features

Flexible monitoring to meet the needs of your servers

Proven monitoring components including...

- Services & processes
- Performance
- HTML & FTP
- E-mail
- SQL
- Files & folders
- Printer
- Logs

Custom monitoring

Real-time alerting

Built-in web reporting

Components fully compatible with Sentry-go Quick Monitors

Monitor what you want, when you want …

In today's complex environments, Windows servers play an increasing part. From file servers running on Windows 2003 through to databases and web servers on the latest technology, ensuring these are functioning correctly can be critical to your business.

Sentry-go Plus! is our latest generation monitoring solution. Built to complement our popular Quick Monitor range, Sentry-go Plus! provides a dynamic, flexible environment by letting you choose exactly which monitoring options you wish to use. These can be used singularly or combined as required, and mean you only purchase the components your server will use.

And as your server's roles change, so can Sentry-go Plus! Simply add or move components to where they're needed to continue monitoring 24 x, 365 days a year … it's that simple.

Sentry-go Plus! includes a Client Console, allowing alerts & activity to be displayed locally or remotely in real-time, while the fully integrated web server gives you access to monitored data direct you're your desktop web browser.

By selecting the monitoring components needed (see overleaf), you can easily tailor Sentry-go Plus! to your individual needs.

For more specific requirements where more standard checks are not enough, check out script-based monitoring! Simply tell the monitor how to monitor and what to look for in the result!

And remember, in addition to alerting options, Sentry-go's own auto-responses can also be defined, allowing your monitoring solution to take immediate corrective action the moment a fault is detected.

For a flexible monitoring solution to meet your needs today, tomorrow and beyond, look no further than Sentry-go Plus!
