Be Proactive, Not Reactive!

Sentry-go allows many of its monitoring checks to be scheduled, some at regular intervals & others either regularly, or at set times each day or week.

Scheduling a Monitoring Check

By default, a monitoring check will be performed at regular intervals throughout the day, as determined by the value at the bottom of the main configuration list.

Monitor Free Disk Space

The following drives are currently defined. You can modify these settings by clicking the appropriate button below ...

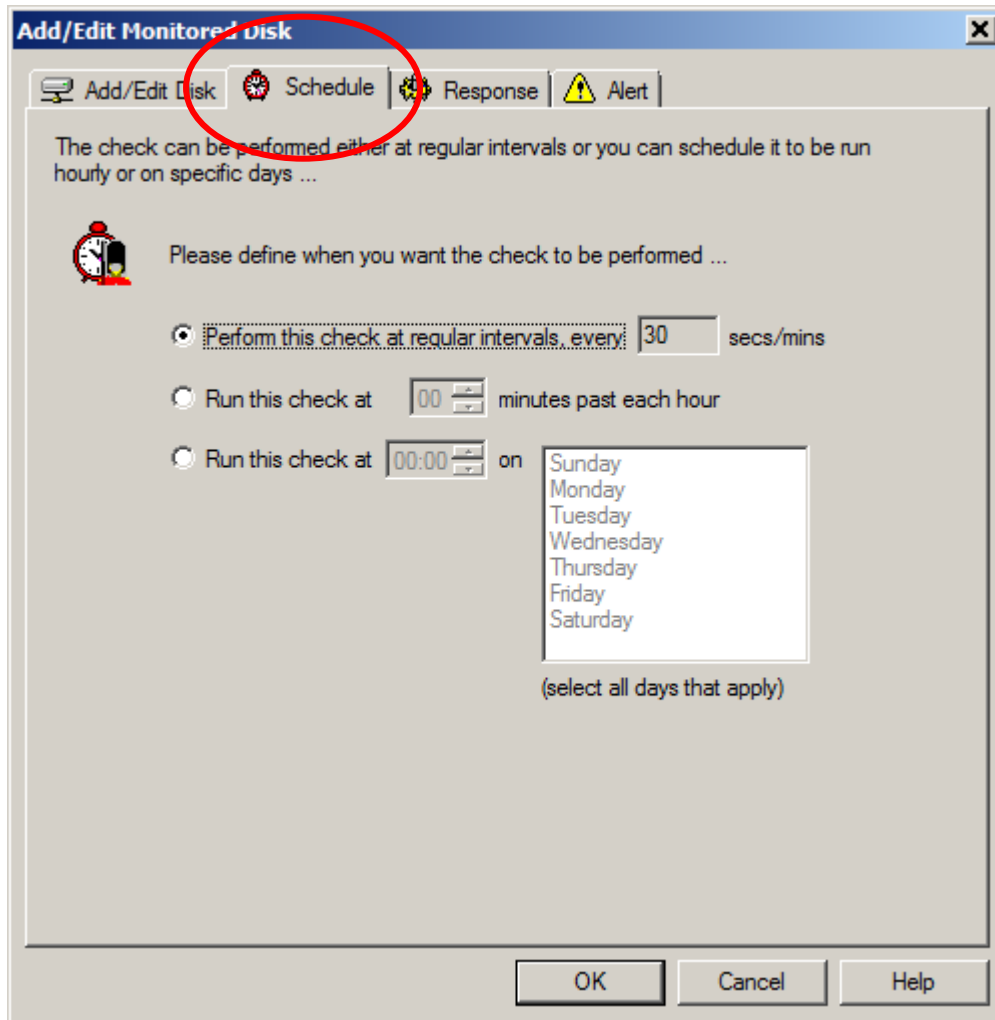

Drive	Free Space	Interval	Action	No. Errors	Alert Group
<input type="checkbox"/> A:	20 %	Default	No Response - Alert Only	1	1
<input checked="" type="checkbox"/> C:	10 %	Default	No Response - Alert Only	1	1
<input checked="" type="checkbox"/> D:	100 Mb	Default	No Response - Alert Only	1	9

Free disk space should be checked every minutes

Buttons: Show Me ..., Delete, Add ..., Edit ...

Buttons: OK, Cancel, Help

However, for many checks, you can override this default behaviour for a specific test by displaying its properties. From here, select the “Schedule” tab ...

Perform this check at regular intervals, every (mins)

Select this option to use the default interval specified at the bottom of the on the main list window. In this case the check will be performed every X minutes or seconds, depending on the check.

Run this check at HH:MM and every hour thereafter

Select this option to run the check at the specified time past each hour. In this case, only the minutes (MM) are used to determine when the check is to be performed.

Run this check at HH:MM On [Days]

Select this option to run the check at the specified time on the given days. In this case, the check will be performed at the given time if the associated day has been selected. Select all days that apply.

More Information, Help & Support
